Range

Ultraviolet surface disinfection

www.bio-uv.com

Benefits of BIO-SCAN® range

BIO-SCAN® range products are:

- **Without chemical products, without risk to health** or environment
- Tested according to the **AFNOR NF T72-281** standard for airborne disinfection of surfaces
- Adapted to all types of surfaces **without side-effects or deterioration**
- **Practical, ergonomic and easy to use** by anyone
- **Economical:** lower acquisition cost than chemical disinfection products and fast return on investment
- **Designed and manufactured in France**

And:

- **Eliminates at least 99.99% of micro-organisms, bacteria and viruses** (including SARS-COV-2 / Coronavirus)
- A surface disinfection concept offering **confidence and reassurance to your clients and personnel**

How UV works

At a wavelength of 254 nanometres, UV-C inactivates micro-organisms (viruses, bacteria, algae, yeasts, moulds, etc.) by penetrating their DNA, thereby disrupting their metabolism until they are completely destroyed.

Lamps specially designed for surface treatment, a BIO-UV Group patent

**2-Years
warranty**
